Adaptive Curriculum – eLearning (Turkey): Adaptive Curriculum, a unit of Sebit Technologies, uses realistic, engaging visuals and hands-on activities to help students develop knowledge and critical thinking skills needed to improve math and science performance.

Airlight* – Engineering (Switzerland): Airlight develops lightweight pneumatic structures for use in advanced structural engineering applications. Its patented Tensairity technology has applications in many wide-span structures, such as roofs, bridges and scaffolding.

Alaris – Authentication technologies (UK): Alaris is a joint venture between Rolls-Royce and Arizona State University, formed to commercialize a Rolls-Royce developed signature verification technology called SignHear in several markets including education, healthcare and child care security.

American Solar Electric – Solar Technology: American Solar is a full-service, design-build firm specializing in photovoltaic applications for the commercial and residential sectors. It provides expertise in solar systems design, procurement, installation, interconnection and commissioning.

Arizona International Growth Group * – Trade Association: AZIGG is dedicated to helping grow global business in Arizona through education, networking and collaboration.

ATOMdesign – Design: ATOMdesign is a full-service product development and branding firm specializing in the commercialization of emerging technologies and markets. Like its customers, ATOMdesign is at the forefront of discovery and aspires to be the champions of tomorrow’s breakthrough technologies and ideas.

Aviza – Healthcare software: Aviza provides healthcare software solutions and web applications to leading research organizations, healthcare providers and advocacy groups. Its four products reduce healthcare costs, increase operational efficiency and enable the delivery of higher quality patient care.

Canon – Imaging Equipment (Japan): Canon is a world leader in technology and innovation in the areas of photography and imaging equipment, with an industry-leading track record for environmental stewardship.

CenturyLink Communications – Telecommunications: CenturyLink’s industry-leading national fiber-optic network meets the communications and entertainment needs of its residential and business clients. CenturyLink participates in Networx, the largest communications services contract in the world, and is recognized as a leader in the network services market.

Digital Desert Resources Inc.* – Software development: Working with Fortune 500 companies, DDR is implementing a unique training and staffing program.

Embodied Games for Learning* – Educational games: EGL creates life-long learning content specifically for STEM and Health industries. Using an innovative motion-sensing technology (like the KINECT), EGL teaches students a variety of content.

Endovantage – Healthcare software: EndoVantage is building a virtual patient treatment planning center in which medical procedures are planned before treatment and medical devices are robustly tested before patient exposure.

Etherion – IT hardware: Etherion, a subsidiary of Nuon, is research-centric, focused on developing foundational software-based and hardware-based technologies for next generation networking in the areas of high performance data switching and routing business.

EyePower Games* – Education Technologies (Singapore): EyePower is a software development company specializing in video and imaging technology for a number of PC and mobile platforms. EyePower is focused on the education sector, and has developed products for students to hone their verbal skills.
GFS Technology* – Mobile security: GFS Technology focuses on identity management solutions and also works on a platform for mobile users whose mobile devices are used for work, eCommerce, financial transactions and Internet use. The technology protects users by targeting four layers of vulnerability: networks, applications, services and data.

Growth Nation* – Consulting: Growth Nation supports its clients with a carefully selected mix of marketing and sales strategy, planning and implementation. Growth Nation is not fixed on any particular marketing or sales tool, meaning flexibility in exploring all the possibilities for achieving growth.

Hivewyre – Digital Advertising: Hivewyre is an online advertising co-op. The company’s private data cooperative allows advertisers to share their first-party audience data and build targeted campaigns for prospecting new customers.

Hot Salsa Interactive – Mobile applications: Hot Salsa Interactive specializes in innovative mobile apps. Since founding in 1997, they have provided varied Internet related products and services. Presently, the company focus is keenly fixed on the development of family friendly apps which inspire creativity and promote play.

HVS Engineering – Industrial engineering (Singapore): HVS has developed an automated cleaning and monitoring system for heat exchanger systems, an innovation that is more cost efficient than the current alternatives available in the market.

iAxil* – Business Incubation (Singapore): iAxil is the business incubator arm of Ascendas, Asia’s leading business space provider. It is one-stop center for entrepreneurs and is working with SkySong to create global opportunities for local entrepreneurs.

Learnvest – Financial Services: LearnVest is a professional financial planning program guiding individuals from budgeting to investing.

Learning Ovations* – Education Software: Learning Ovations’ product, A2i, is a unique technology platform and professional development regime designed to improve educators’ ability to provide more effective individualized literacy instruction from kindergarten through third grade.

Massively Parallel Technologies – High-performance computing: MPT delivers high-performance computing through Virtual Power Centers, Internet-based hubs designed for specific computationally intense applications that can outperform most mainframes and supercomputers for a fraction of the cost.

Monarch Power – Monarch Power is a privately held research, development, and product company focused on meeting the renewable energy needs of the world.

Mountain Vista Chiropractic – Medical Services: Mountain Vista is part of Valley Wide Health Centers, which provides chiropractic services at nine locations in Greater Phoenix.

Nuon – Computer Resource Virtualization: Nuon uses patented techniques to develop software and hardware products that allow scalable and distributed network computing through virtualization.

PayPal – E-Commerce: PayPal is the faster, safer way to pay and get paid online, via a mobile device and in store. The service gives people simpler ways to send money without sharing financial information, and with the flexibility to pay using their account balances, bank accounts, credit cards or promotional financing.

Pcion – Computer hardware: Pcion develops hardware accelerated solutions for emerging virtualization protocols. The solutions are implemented in FPGAs and ASICs. Pcion also features turnkey board-level solutions for prototyping designs.

Pearson – Education: Pearson is the world’s leading education company. From pre-school to high school, early learning to professional certification, Pearson’s curriculum materials, multimedia learning tools and testing programs help to educate millions of people worldwide - more than any other private enterprise.

Plug and Play Malaysia* – Business Incubation (Malaysia): Plug and Play is a Malaysian government sponsored initiative to accelerate entrepreneurial companies and provide a route to enter the U.S. market.

Snowfall – IT (Sweden): Snowfall designs and builds IT systems that interface directly with customers, such as websites, e-commerce systems, and CRM systems. It also advises on the strategies that drive the implementation of these systems.

SPRING – Government agency (Singapore): SPRING Singapore is the enterprise development agency responsible for helping Singapore enterprises grow. It works with partners to help enterprises in financing, technology and innovation, capability and management development, and accessing new markets.

*Indicates virtual affiliation
Predictive Technologies* – Web-based visualization: Predictive Technologies is a web based interoperable open collaboration data analysis and visualization platform that utilizes proprietary software, customized algorithms, real time and historical data.

Pyxl – Digital Marketing: Pyxl builds digital brands, starting with websites, mobile and web applications that provide integrated and engaging experiences for clients’ customers.

Recruiting.com – Online job search: Recruiting.com provides software and technology to help organizations succeed by recruiting and hiring the right people. Its technology solutions enable employers to find and effectively recruit talent through cloud-based candidate management software and network of leading local, diversity, and niche job boards.

rSmart – Education software: rSmart is dedicated to facilitating the development and implementation of open source software for education. RSmart offers a full range of Sakai and Kuali solutions, backed by comprehensive support and expert services.

Safari Books Online – Online Application: Safari is a digital library founded in July 2001. It was founded as a joint venture between O'Reilly Media and the Pearson Technology Group.

Set for Life Financial – Payment services: Set for Life Financial is a full service payment processing company offering e-commerce solutions for businesses of all sizes.

Smart Store – Enterprise software: Smart Store offers a sophisticated enterprise solution that helps retailers quickly detect, investigate and prevent fraud, theft, or operational inefficiencies, issues alerts and recommends further investigation and corrective action.

SolutionStream – Custom Software: SolutionStream develops, designs, and delivers custom software. They serve as a one-stop shop for application design and development, including graphic design and user interface for both web and mobile platforms.

Starshine Academy – Education: StarShine Academy creates transformational community schools by igniting and enabling the aspirations of children in at-risk communities. Honored by the United Nations and educational leaders, StarShine is a model for a new generation of small community schools.

Theranos – Diagnostic Healthcare: Theranos is working to enable early detection and intervention of disease by making actionable healthcare information accessible to everyone everywhere.

Ticketmaster – Ticketing: Ticketmaster is the world's largest ticket company, providing ticket sales, resale services, marketing, distribution and information on tickets for a wide range of events. Ticketmaster is an industry leader in developing paperless ticket technologies and demographic data mining techniques.

Valley of the Sun Clean Cities Coalition – Advocacy: The Coalition is dedicated to advancing the environmental, energy, and economic security of the Phoenix Metro area, Central and Northern Arizona, by advocating and participating in practices that promote clean domestic energy, and reduce dependence on conventional petroleum-based fuels.

VanDahl Engineering and Construction – Construction services: VanDahl provides a full complement of construction services to meet clients’ needs: preconstruction, general contracting, self-performance of key trades, design-build, and turnkey capabilities.

Virtuon – Cloud computing: Virtuon is a provider of virtualization and cloud computing solutions, providing a full spectrum of solutions including consulting, education and software development.

Workiva – Collaboration software: Workiva (formerly Webfilings) offers a fully-integrated, cloud-based solution dedicated to meeting SEC reporting requirements through real-time collaboration. As a result, Workiva reduces the time, risk, and costs associated with the entire external reporting process.

Yodle – Web advertising: Yodle is a leading provider of local online advertising that provides businesses with a simple and affordable way to get more new customers.

ASU units

Arizona Technology Enterprises (AzTE) – AzTE works with university inventors and industry to transform scientific progress into products and services. AzTE transfers technologies invented at ASU to the private sector by mining university research, prosecuting patents, negotiating licenses, and marketing inventions.

ASU Research Enterprise (ASURE) - ASURE is the off-campus component of ASU’s “Security & Defense Systems Initiative” for conducting higher-TRL applied research and advanced technology development programs, and restricted-access programs that require specialized clearances and facilities.

ASU Entrepreneurship and Innovation Group (EIG) – The EIG is ASU’s platform to help faculty, students and companies linked with ASU accelerate their ventures and commercialize their technologies. The EIG offers a variety of services to clients including individual assistance, training, events and community collaboration opportunities.

AZ Furnace - The Furnace Technology Transfer Accelerator is an intensive, six-month accelerator experience for startups commercializing discoveries made in Arizona laboratories. Furnace is a partnership with Dignity Health Arizona, NAU Innovations, University of Arizona's Tech Launch Arizona, The Mayo Clinic, and BioAccel.

Complex Adaptive Systems Network (CASN) – CASN leverages trans-disciplinary relationships to address complex global challenges in health, sustainability, security and education by creating entirely new technologies and novel solutions. This requires integration of diverse research disciplines across the University and building an extended network of global collaborations.

ASU Economic Development – ASU’s economic development team works with the economic development community throughout Arizona, partnering with local and statewide organizations to build the state’s economy

EdPlus at ASU – EdPlus at ASU (formerly ASU Online and Extended Campus) offers a variety of undergraduate and graduate degree programs delivered globally online and at off-campus locations throughout Arizona though convenient, flexible formats.

Edson Student Entrepreneur Initiative – Edson provides funding, office space and training for teams of ASU students to explore their innovative ideas for business products and services in partnership with faculty, researchers and successful entrepreneurs from both the academic and private sectors.

Innovation Advancement Program (IAP) – IAP is a credit-carrying course open to graduate and honors undergraduate students in business, engineering, the sciences and law. Student teams assist in the commercialization and monetization of new technologies developed at ASU.

Strategic Industry Collaboration – The Strategic Industry Collaborations team is focused on increasing the university’s accessibility to business collaborations. They work to identify strategic industry opportunities that will increase the university’s economic impact in the state, region, and beyond.

Technology Based Learning and Research (TBLR) – TBLR focuses on research and large-scale delivery of educational materials as well as technology training and integration using computers and other information and communication technologies.
